

Maggie,

Please accept this e-mail as an acclamation of appreciation for your accomplishments concerning the Cardiovascular Medical Office Building in Lawrenceville Georgia.

You and your team's expertise and talent were clearly evident in the procurement process and final products that were provided and installed. Your talents, teamwork and commitment to your client (me) were pronounced especially in the end of the project whereby you and your team pulled together to furnish and install the special feature screening that I inadvertently missed during the buyout process. Because of your dedication to your client and in the overall best interest of the project, the end result was a great success. It is in my opinion that the workmanship in the final products was superb, and was a marvelous accent to the overall artistic concept of the building as designed by Stanley Beaman and Sears (SB&S). SB&S won the American Society of Interior Designers annual gold design award in health-care category for their work on the facility (see Atlanta Business Chronicle May 5-11, 2006). You should take extreme pride in your efforts concerning this project as they were an intricate part to the overall success and beauty of the project. I look forward to the opportunity to work again with you and your organization on future projects.

Best regards,

*Ryan Rogusky*
